WORK EXPERIENCE

Software Developer freelance

10/2018 – Present

Copenhagen, Denmark

Achievements / Tasks

- Built an indecision app in react permitting users to plan their daily activities with the possibility of randomly selecting one with the click of a button.
- Developed a weather application permitting weather forecast checks for users for any location of their choice. Created an API with the express library for accessing different endpoints of the site.
- Developed a currency converter application in react, calculating currency exchange rates from one currency to the intended currency of choice by fetching data from the fixer.io API with the help of the axios library and displaying the result of the calculated rate for the user.
- Built a quotes app with the use of the react framework by manipulating an API and accessing the various quotes and the respective authors, then rendering them randomly to the user with the click of a button.
- Currently Developing an online portfolio to demonstrate my skill set and make my profile available on the internet.

Junior Business Analyst Believers Love-world Ministries

10/2014 – 06/2017

London, UK

Achievements/Tasks
